

Fire Extinguisher Information

If you have a fire extinguisher that you would like to discard or recharge, you may contact Ralph J. Perry Inc. of Hyannis at (508) 775-3473.

They come to the Island on a regular basis and may be able to recharge your extinguisher.

Some basic information:

If you want to throw out the extinguisher and it's full (needle to the right on the gauge), you must wait for a hazardous waste day at the landfill. If it is empty of nitrogen pressure (the gauge says empty or the needle is to the left, you should be able to take it to a landfill any time).

If the valve is plastic, Ralph Perry will not recharge it.

Any questions, please contact Ralph Perry at (508) 775-3473.
