

Chappy Cell Committee

1/15/16 - Darack, Filley, Kennedy - By Phone Gurnitz - In the audience - Bob Fynbo, Claire Thacher, and John Dropick

Chris Kennedy began by discussing the interest AT&T has in putting a temp site at Wasque/TTOR property.. Chris reviewed the process so far. Showed coverage map and description of monopole. He said they will be here in February to do further work. Will need building permit and need to go to planning board for dcpc review. They want to be operational by May 1. BobG wanted info about the coverage map. It was suggested that we have AT&T make the maps the same as the previous coverage so that we can do an apples to apples comparison. Chris has spoken with them about having multiple carriers. Bob Fynbo said he would like support of the committee and the town. A discussion of the Fynbo Tower and permits finished with Bob's response that the tower was permitted by the FCC so this would be the first time in front of town board. Bob Gurnitz said he is in favor of the Tower going to Fynbo and asked if we would support it as a committee. Woody will contact Jonathan and Roger for their input.

Approved 6/15/17
