

Chappy Cell Committee

9/4/15 9am - Darack, Filley, Gurnitz, Becker, Kennedy, Cobb (?) - - Edgartown Town Hall
Updates for both subcommittees were given. Adam talked about correspondence from Ken (Grain) which gave detailed information about the cell industry, but said he could not distribute until Ken had it in a releasable form. He spoke with Ken about the tower being stealth and would follow up with him and AT&T about acceptable heights for the tower. Bob reported on the "cellboat" concept that was presented to the committee via email. After further research he said they had not actually deployed them yet, and that it appeared to be a land based, or attached to land product. It was agreed that we should contact Chris Seidel at the MVC for assistance with viewshed analysis. Roger gave an update on pole numbers (now 31). Bob was wondering what we could use as a frame of reference for the size of the poles to be used on Chappy for DAS. He referenced the poles on the Edgartown/VH road. Bob asked that Roger send Enright the letter from the Selectmen with the new charge and deadline information. A discussion of how the selectmen were going to do the survey followed. Woody was going to talk to the MV Times about coverage. The committee voted (all in favor except Bob) to not give a detailed report to the selectmen, but just a general update. Next meeting 9/11 at 8:30AM

Approved 6/15/17
