

Chappy Cell Committee

9/25/15 10 AM Gurnitz, Filley, Cobb, Darack, Becker - - Edgartown Town Hall

Adam discussed some preliminary results from the survey. He noted that the second highest margin was people requesting multiple carrier coverage.

Discussion followed about what questions still need to be answered. Specific questions for Verizon included would they take multiple carriers on their DAS and the status of their design. Questions for AT&T and Grain include what minimum height would grain or AT&T be willing to go, are there other parcels that would work better than the one being considered. Specifically for Grain would they be willing to consider building a DAS. Adam will connect with grain and AT&T for consistency. There were questions about the lot being considered and if there were any restrictions on it. Also people wanted to get some more info on what the permitting process is for either a tower or DAS. This is most likely a Lenny question. Next meeting 10/2.
